

Stop unnecessary vehicle manouvering!

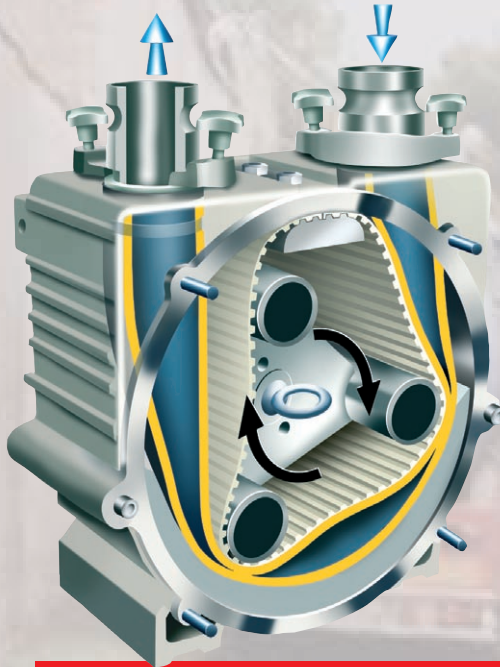

Get your liquid transported to tankers or trucks within a **50 metres** radius.

- suction length up to 50 m possible
- easy transportable and mobile unit (Approx.55 kg)
- ideal for abrasive, viscous and aggressive liquid media
- can be vehicle mounted and hydraulically powered or available as a separate unit
- dry self-priming max. 9.5 m lift
- dry running resistant – no sealing and leakage problems
- no additional vacuum equipment required
- reversible versions – interchangeable suction and discharge ports (option)

CRANE

- pumping of media with entrained solids or fibrous materials
- infinitely adjustable output variable to > 20m³/h up to 2 bar
- standard electric motor (400 V/50 Hz) or available in Ex, petrol, diesel or hydraulic versions
- selection of hose material for product compatibility
- cost saving alternative to conventional pump technologies
- one wearing part only – easy to change
- no special tools required

The ELRO Complete System

ELRO peristaltic hose pumps are available with a variety of accessories to suit all applications.
